We're always looking to improve the accessibility of this website. If you find any problems please contact us:

- email accessibility@marcolin.com

We'll consider your request and get back to you in 30 days.

Technical information about this website's accessibility

Compliance status

This website is **partially compliant** with the EN 301549 "Accessibility requirements for ICT products and services", the European Standard and Web Content Accessibility Guidelines version 2.2 AA standard.

Non-compliance with the accessibility regulations

- C.9.1.1.1 – Non-text Content: Some images, icons, or other non-text content do not have a text description.
- C.9.1.3.1 – Info and Relationships: In some cases, the structure or meaning of content is shown only visually and is not coded so assistive tools can read it.
- C.9.1.4.1 – Use of Color: In some cases, color alone is used to give meaning or show a difference.
- C.9.1.4.3 – Contrast (Minimum): Text and images of text do not always have enough contrast, except for items like logos.

- C.9.1.4.4 – Resize text: Some text cannot be made twice as big without losing content or features (captions and text images excluded).
- C.9.1.4.5 – Images of Text: Some images of text are used instead of real text, even though they are not needed and cannot be changed.
- C.9.1.4.10 – Reflow: Content that does not need a 2D layout does not reflow when the screen is resized.
- C.9.1.4.11 – Non-text Contrast: Some important components do not have a contrast ratio of at least 3:1 with nearby items.
- C.9.1.4.12 – Text Spacing: Changing line, paragraph, letter, or word spacing makes some content disappear.
- C.9.2.1.1 – Keyboard: Some features cannot be used with a keyboard.
- C.9.2.4.1 – Bypass Blocks: There is no way to skip blocks of content that repeat on many screens.
- C.9.2.4.2 – Page Titled: Some screens have no title that explains their topic or purpose.
- C.9.2.4.3 – Focus Order: When users tab through content, the focus order does not match the meaning or how things work.
- C.9.2.4.4 – Link Purpose (In Context): The purpose of some links or controls is not clear from their text or context.
- C.9.2.4.6 – Headings and Labels: Some headings or labels do not clearly describe the content or function.
- C.9.2.4.7 – Focus Visible: Some interactive elements have no visible focus indicator when using the keyboard.
- C.9.2.5.1 – Pointer Gestures: Some features need complex gestures and have no single-pointer alternative (unless the gesture is essential).
- C.9.2.5.3 – Label in Name: For some components, the name read by assistive tools does not match the visible label.
- C.9.3.2.2 – On Input: Changing a setting in some inputs causes a context change.
- C.9.3.3.1 – Error Identification: When an error is detected, the wrong field is not shown or the error is not described in text.
- C.9.3.3.2 – Labels or Instructions: There are no labels or instructions when the user must enter data.
- C.9.3.3.3 – Error Suggestion: When an error is found and a fix is known, the fix is not shown

(unless it would break security or purpose).

- C.9.4.1.2 – Name, Role, Value: Some components do not pass their name, role, state, or value to assistive tools, or do not notify them of changes.
- C.9.4.1.3 – Status Messages: Some status messages cannot be read by assistive tools without changing focus.
- C.10.1.3.1 – Info and Relationships: In some documents and some cases, the structure or meaning of content is shown only visually and is not coded so assistive tools can read it.
- C.10.2.4.2 – Page Titled: In some documents, some screens have no title that explains their topic or purpose
